MATERIALS SCIENCE AND ENGINEERING A VOLUME 186, NUMBERS 1–2, OCTOBER 15, 1994

Contents

Mechanism of the bamboo boundary internal friction peak 1
T. S. Kê (Hefei, China)

The rate-dependent mechanical behavior of modified 9wt.%Cr–1wt.%Mo steel at 538 °C 15
M. B. Ruggles (Oak Ridge, TN, USA), S. Cheng and E. Krempl (Troy, NY, USA)

The isotopic viscoplasticity theory based on overstress applied to the modeling of modified 9wt.%Cr–1wt.%Mo steel at 538 °C . 23
P. S. Majors and E. Krempl (Troy, NY, USA)

Crystallographic texture gradients in the aluminum 8090 matrix alloy and 8090 particulate composites 35
M. A. Przystupa (Los Angeles, CA, USA), A. K. Vasudévan (Arlington, VA, USA) and A. D. Rollett (Los Alamos, NM, USA)

Fatigue crack growth and deformation in weldments of aluminium alloys 45
R. Hermann (Milton Keynes, UK) and D. L. Bartlett (Farnborough, UK)

Mechanical properties and microstructure of Al–Fe–X alloys 55
J. C. Ehrström (Voreppe, France) and A. Pineau (Evry, France)

Cyclic response and dislocation structures of AISI 316L stainless steel. Part 1: single crystals fatigued at intermediate strain amplitude 65
Y. Li and C. Laird (Philadelphia, PA, USA)

Cyclic response and dislocation structures of AISI 316L stainless steel. Part 2: polycrystals fatigued at intermediate strain amplitude 87
Y. Li and C. Laird (Philadelphia, PA, USA)

Structures and mechanical properties of rapidly solidified deposits of an Fe–1.50wt.%C–10.7wt.%Cr alloy by low pressure plasma spraying 105
K. Murakami, Y. Fujii, H. Matsumoto, T. Irisawa, T. Okamoto, T. Kawai, J. Imazu, K. Niihara and Y. Miyamoto (Osaka, Japan)

Hydrogen effects on slip character and ductility in Ni–Co alloys 113
X. Tang and A. W. Thompson (Pittsburgh, PA, USA)

Cyclic plastic strain energy as a damage criterion and environmental effect in Nb-bearing high strength, low alloy steel 121
Y. W. Chung (Evanston, IL, USA) and W. J. Lee (Taejon, South Korea)

Fracture mode transition in response to processing technique, heat treatment and stress state for a rapidly solidified Al scrap alloy 129
D. M. Li and A. Bakker (Delft, Netherlands)

Microstructural development during fatigue of copper foils 20–100 μm thick 135
M. Judelewicz, H. U. Künzi, N. Merk and B. Ilschner (Lausanne, Switzerland)

Determination of the static and dynamic mechanical properties of Fe–Cr–Si–B metallic glass wire 143
A. Olofinjana and H. A. Davies (Sheffield, UK)

Determination of the kinetics of TiAl formation from fine Ti and Al particles using differential scanning calorimetry 151
X. Wang, H. Y. Sohn and M. E. Schlesinger (Salt Lake City, UT, USA)

Reversibility of the allotriomorphic ferrite and austenite transformations 157
S. Suzuki and H. K. D. H. Bhadeshia (Cambridge, UK)

On the question of nitrate formation by N-containing austenitic stainless steels 163
D. Kim, C. R. Clayton and M. Oversluizen (Stony Brook, NY, USA)

Tracer diffusion of carbon in Fe–Ni–Cr–C alloys 171
J. Čermák (Brno, Czech Republic) and H. Mehrer (Munster, Germany)

Behavior of PbO in the two-stage sintering of PLZT ceramics 177
W. K. Lin and Y. H. Chang (Tainan, Taiwan)

CONTENTS (*continued*)

Effects of humidity and sliding speed on the wear properties of Si_3N_4 ceramics 185
K. H. Lee and K. W. Kim (Taejon, South Korea)

LETTERS

Modelling of grain rotations during compression deformation of polycrystalline intermetallic $L1_2$ compounds L1
D. Raabe (Aachen, Germany)

A measure theoretic derivation of Richardson's equation L5
T. J. Mackin (Santa Barbara, CA, USA), C. T. Chen (University Park, PA, USA), J. J. Mecholsky (Gainesville, FL, USA) and J. Runt (University Park, PA, USA)
